‘REPORT ON LEAN SIX SIGMA YELLOW BELT TRAINING PROGRAMME’

Taking forward the International Collaboration with Binghamton University, Lean Six Sigma Yellow Belt DMAIC course was conducted for the second time at AISSMS College of Engineering. It was an in-person training program delivered by the renowned trainer Prof. Michael Testani (Senior Director of External Outreach and Engagement at Binghamton University’s Thomas J. Watson School of Engineering and Applied Sciences).

It was attended by 106 UG students from AISSMS College of Engineering from all disciplines. The program's goals were to expose learners to Lean Six Sigma and its methodologies, as well as to inculcate knowledge about different ways to solve a single problem. The participants had gone through a variety of exercises and realized the value of having practical knowledge that can be implemented in a real-life scenario.

Participants were able to understand the Lean Six Sigma problem-solving model as well as the overall approach and methodology after completing the two and half day LSSYB DMAIC Course. They also learned about the model's core methods, as well as when and how to apply them. Participants will be able to successfully contribute to a DMAIC process improvement effort using the knowledge and skills gained from core Lean Six Sigma methods. They are now capable of driving the value through Lean Six Sigma in their project/internship/sandwich training.

Following the international training, an intriguing test was conducted and certificates were issued by AISSMS College of Engineering as well as Binghamton University, USA.

From,

Students of Third Year

Production S/W Engineering.

Subject: Request for changing the soft skills lecturer.

Requested sir,

I am writing this application on behalf of our Third Year Production Engineering Class. In order to bring our issue to your address regarding our 'Soft Skill Trainer', we did attend two days of lectures by this trainer {12hrs}.

Sir we assume that soft skills lectures will help us developing our skills and help us prepare for the future exam, and interviews but unfortunately, we as a class have collectively came to a decision that the trainer does nothing to make the class interactive enough, again mentioning the fact that the class is about "SOFT" skills, this results in unintentional lower attendance in the class and I am afraid the whole point of having a soft skill lecture by a specialized trainer is not fulfilled.

The Trainer makes no efforts in training, which we all need, he just discusses the answers of questions shared, which makes us not understand the topic conceptually. It does not help us in developing the soft skill as per say.

So, I kindly request you to consider our problem and arrange a new trainer as a solution to this issue, for our class.

We hope that, you'll definitely understand us.

Thank you!
