

BE Cloud Computing (410253 (C)) (2015 Course) - In Sem Exam June 2021

Important Instructions

1. Provide your personal Gmail id
2. Select your Name, Exam Seat No., and PRN No. carefully
3. There is a total of 36 questions divided into 3 sections, each section has 12 Questions.
4. All questions are multiple-choice questions
5. Each Question carries 1 Mark
6. 30 correct answers will be considered as a final mark for result calculation (As per SPPU guidelines)

*Indicates required question

1. Email *

KENNEDY ROAD, PUNE-411 001

12. Cloud computing is a _____ system and it is necessarily unidirectional in nature *

Mark only one oval.

- Stateless
 Reliable
 Stateful
 Stratful

13. What does IDaaS stands for..... *

Mark only one oval.

- ID as a Service
 Identity as a service
 Identification as a service
 Identify as a Service

14. What are the types of scaling *

Mark only one oval.

- Horizontal
 Vertical
 Both A and B
 None of the above

15. SaaS supports multiple users and provides a shared data model through _____ model. *

Mark only one oval.

- Single-tenancy
 Multi-tenancy
 Multiple-instance
 Multiple data

16. VLANs and IP addresses resources are made available to end user via *

Mark only one oval.

- Server virtualization
 Client virtualization
 End User virtualization
 IAAS

Section 2 (12 Questions)-Unit 2

Question No 13 to 24

17. Columns in HBase are organized to *

Mark only one oval.

- Column group
 Column base
 Column list
 Column families

Which is wrong statement in case of cloud security

Copy

150 responses

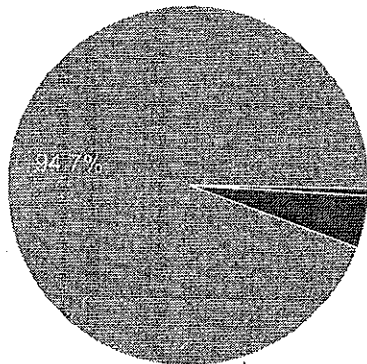

- You can use proxy and brokerage services to separate clients from direct access to s...
- Cloud computing doesn't have vulnerabilities associated with Internet applications
- Any distributed application has a much greater attack surface...
- Any Sequential application has a much greater attack surface...

Section 3 (12 Questions)-Unit 3

Creating more logical IT resources, within one physical system is called

Copy

150 responses

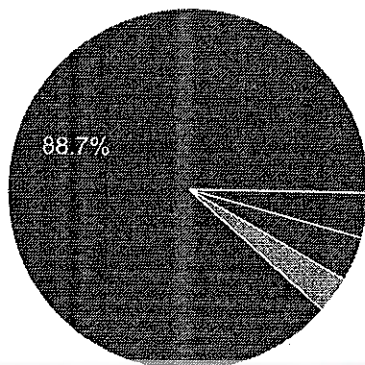

- Load balancing
- Hypervisor
- Virtualization
- Loading data

Which is not a benefit of virtualization?

Copy

150 responses

- Flexible and efficient allocation of resources
- Lowers the cost of IT infrastructure
- Remote access and rapid scalability
- Run on single operating system

18. Which of the following is a distributed multi-level database? *

Mark only one oval.

- HDFS
 HBase
 Hive
 Pig

19. Which of the following is component of Hadoop *

Mark only one oval.

- HDFS
 Map Reduce
 YARN
 All of the mentioned

20. HADOOP framework is written in *

Mark only one oval.

- Python
 Java
 C++
 Scala

21. Which among the following is the component of Apache HBase? *

Mark only one oval.

- Region Server
 HMaster
 Zookeeper
 All of the mentioned

22.Handles the read and write requests for the regions which under it. *

Mark only one oval.

- Region server
 Master server
 Zookeeper
 Zoodata

23. DynamoDB uses eventually consistent and strongly consistent reads to support * which application

Mark only one oval.

- Dynamic
 Sequential
 Multiple
 Parallel

24. Hadoop is a framework that works with a variety of related tools. Common cohorts include: *

Mark only one oval.

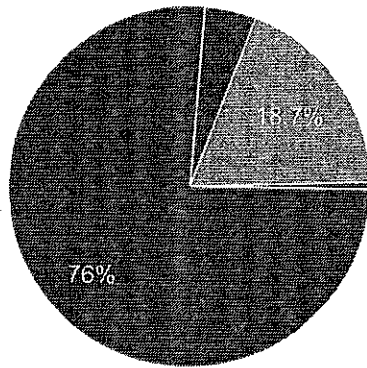

- MapReduce, MySQL and Google Apps
 MapReduce, Hummer and Iguana
 MapReduce, Google Apps
 Mapreduce,Hive,Hbase

It helps a user to have remote access to an application from a server.

 Copy

150 responses

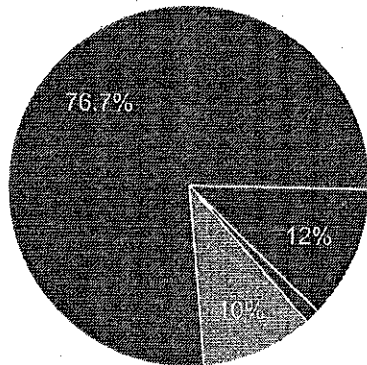

- Application virtualization
- Network virtualization
- Desktop virtualization
- Storage virtualization

Which is the correct type of full virtualization?

 Copy

150 responses

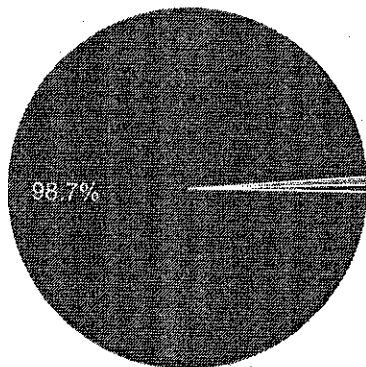

- Software assisted
- IoT assisted
- Hardware-assisted
- Software assisted and Hardware-assisted both

It has the ability to run multiple virtual networks with each has a separate control and data plan.

 Copy

150 responses

- Application Virtualization
- Network virtualization
- Desktop virtualization
- Storage virtualization

25. HBase is a distributed _____ database built on top of the Hadoop file system. *

Mark only one oval.

- Column-oriented
 Attribute-oriented
 Tuple-oriented
 Cell-oriented

26. Which among the following runs on top of HDFS and provides BigTable (Google) like capabilities to Hadoop. *

Mark only one oval.

- Hcatalog
 Hive
 Pig
 HBase

27. Which of the following impose additional overhead on clients and offer faster transfer? *

Mark only one oval.

- Block storage
 File Storage
 File Server
 Data

28. Which is wrong statement in case of cloud security? *

Mark only one oval.

- You can use proxy and brokerage services to separate clients from direct access to shared cloud storage
 Cloud computing doesn't have vulnerabilities associated with Internet applications
 Any distributed application has a much greater attack surface than an application that is closely held on a Local Area Network
 Any Sequential application has a much greater attack surface than an application that is closely held on a Local Area Network

Section 3 (12 Questions)-Unit 3

Question No 25 to 36

29. Creating more logical IT resources, within one physical system is called ____ *

Mark only one oval.

- Load balancing
 Hypervisor
 Virtualization
 Loading data

30. Which is not a benefit of virtualization? *

Mark only one oval.

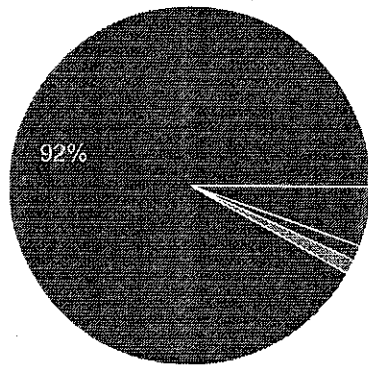

- Flexible and efficient allocation of resources
 Lowers the cost of IT infrastructure
 Remote access and rapid scalability
 Run on single operating system

Full form of AMI?

 Copy

150 responses

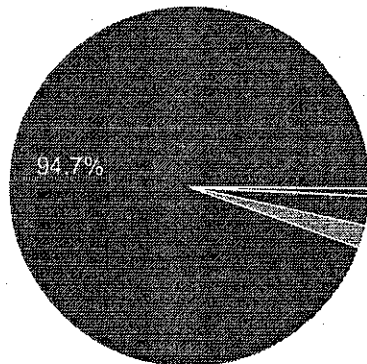

- Amazon Memory Image
- Amazon Memory Instance
- Amazon Machine Instance
- Amazon Machine Image

In computing, _____ improves the distribution of workloads across multiple computing resources, such as computers, a computer cluster, network links, central processing units, or disk drives.

 Copy

150 responses

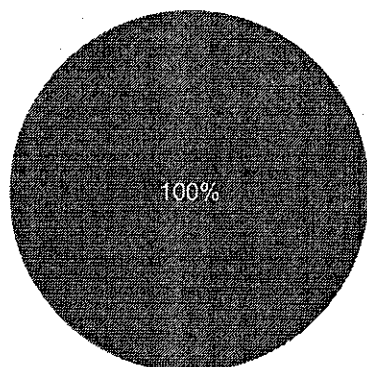

- Virtual machine
- Virtual computing
- Virtual cloud
- Load balancer

Ajax stands for?

 Copy

150 responses

- Asynchronous Java and XML
- Asynchronous JavaScript and XML
- Asynchronous Java
- Asynchronous PHP

35. In computing, _____ improves the distribution of workloads across multiple computing resources, such as computers, a computer cluster, network links, central processing units, or disk drives. *

Mark only one oval.

- Virtual machine
 Virtual computing
 Virtual cloud
 Load balancer

36. Ajax stands for? *

Mark only one oval.

- Asynchronous Java and XML
 Asynchronous JavaScript and XML
 Asynchronous Java
 Asynchronous PHP

37. _____ is an operating system or application environment that is installed on software, which reproduces dedicated hardware virtually. *

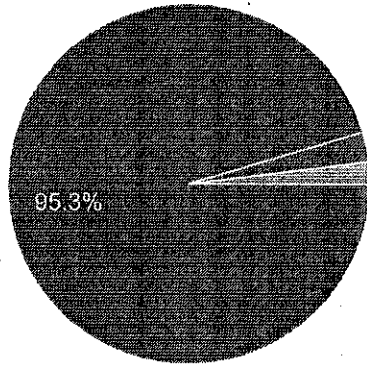

Mark only one oval.

- Virtual machine
 Virtual computing
 Virtual cloud
 Virtual Process

_____ is an operating system or application environment that is installed on software, which reproduces dedicated hardware virtually.

150 responses

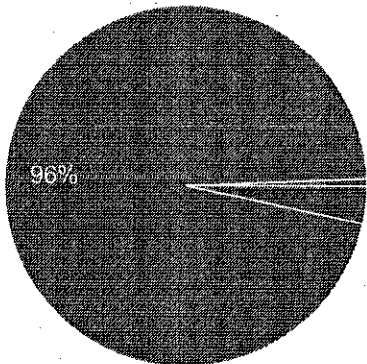

- Virtual machine
- Virtual computing
- Virtual cloud
- Virtual Process

_____ is the approach used to virtualized different resources of a computer like its processor, memory, and I/O devices

150 responses

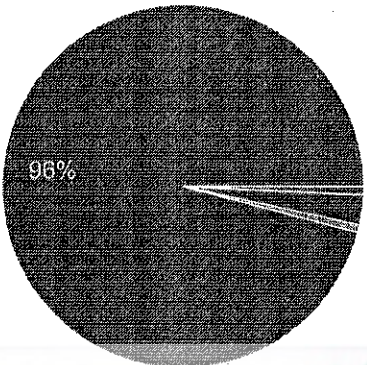

- OS level
- Hardware abstraction Level
- User Level
- Abstraction data level

In a _____ scheme, the VM is installed as a Type 1 Hypervisor directly onto the hardware.

150 responses

- para virtualization
- Emulation
- Extensive
- Full Virtualization
