विषय :- नविन नायडू शुद्धीकरण केंद्र येथे शैक्षणिक प्रशिक्षण दरम्यान पाहणीसाठी परवानगी मिळणेबाबत.

संदर्भ :- आपले पत्र आ.क्र.४७ दि.१२/४/२०२३

आपले कॉलेजमधील अभ्यासक्रमासाठी संदर्भाकित पत्रान्वये नविन नायडू मैलापाणी शुद्धीकरण केंद्र, पुणे या प्रकल्पावर शैक्षणिक पाहणीसाठी परवानगी मागितली आहे. दि.१७/४/२०२३, दि.१८/४/२०२३ व दि.१९/४/२०२३ रोजी सकाळी १०.३० वा. (प्रत्येक दिवशी ४० विद्यार्थी) याप्रमाणे सदर प्रकल्पाला भेट देण्याची परवानगी खालील अटी व शर्तीस अधिन राहून आपणांस देणेत येत आहे.

अटी व शर्ती

- १) पुणे शहरातील विविध भागातून येणारे मैलापाणी शुद्धीकरण करून नदीमध्ये सोडणेत येते. त्यासाठी कमी अधिक क्षमतेची प्रक्रिया केंद्रे उभारणेत आली आहेत सदर प्रकल्पात विविध टप्प्यांमध्ये मैलापाण्यावर प्रक्रिया करणेसाठी डायजेस्टर, क्लॉरिफायर, एरिएटर, सेंट्रीफ्युज, डिक्कंटर, सी.सी. टी. (Cl₂ टँक) इ. प्रकारचे बांधकाम उभारणी केलेली आहे. याशिवाय या ठिकाणी बऱ्याच उघड्या टाक्या आहेत याची नोंद घ्यावी. तसेच सदर प्रकियेमध्ये आरोग्यास काही प्रमाणात हानीकारक असणारे प्रदूषण वायू निर्माण होतात.
- २) पाहणीसाठी आलेल्या सर्व विद्यार्थ्यां सोबत ओळखपत्र असणे बंधनकारक आहे.
- ३) सर्व विद्यार्थी व स्टाफ यांना कोविड-१९ च्या अनुषंगाने मास्क लावणे बंधनकारक असणार आहे. तसेच विना मास्क कोणालाही प्रवेश मिळणार नाही याची दक्षता घ्यावी.
- ४) दोन्ही लस घेतलेल्या विद्यार्थ्यांनाच प्रवेश देण्यात येईल. सर्टिफिकेट बंधनकारक आहे.
- ५) अभ्यास दौरा चालू असताना विद्यार्थी यांचेमधील अंतर कमीतकमी २ फूट असणे बंधनकारक आहे.
- ६) प्रकल्प पाहणीचे वेळी कोणत्याही प्रकारचे गैरवर्तन करू नये. प्रकल्पावरील कामकाजाचे फोटो काढणे अथवा चित्रिकरण करणे त्यासाठी विशेष परवानगी घेणेत यावी.

To,

Vishvaraj Environment Pvt. Ltd.
Pune.

Dear Sir,

We sincerely wish to thank you for guiding TE Civil students from AISSMS College of Engineering during the site visit to Dr. Naidu Sewage treatment Plant conducted on 17th and 18th April 2023.

Looking forward for same cooperation from you in future

Thanking You!

Regards,

Mr. C. R. Yeole

Visit Report on 115 MLD DR. NAIDU STP PUNE

Introduction:

Sewage is the wastewater released by residences, businesses and industries in a community. It is 99.94 percent water, with only 0.06 percent of the wastewater dissolved and suspended solid material. The cloudiness of sewage is caused by suspended particles which in untreated sewage ranges from 100 to 350 mg/l. A measure of the strength of the wastewater is biochemical oxygen demand, or BOD₅. The BOD₅ measures the amount of oxygen microorganisms require in five days to break down sewage. Untreated sewage has a BOD₅ ranging from 100 mg/l to 300 mg/l. Pathogens or disease-causing organisms are present in sewage. Coliform bacteria are used as an indicator of disease-causing organisms. Sewage also contains nutrients (such as ammonia and phosphorus), minerals, and metals. Ammonia can range from 12 to 50 mg/l and phosphorus can range from 6 to 20 mg/l in untreated sewage. Sewage treatment is a multi-stage process to renovate wastewater before it re-enters a body of water, is applied to the land or is reused. The goal is to reduce or remove organic matter, solids, nutrients, disease-causing organisms and other pollutants from wastewater. Each receiving body of water has limits to the amount of pollutants it can receive without degradation. Therefore, each sewage treatment plant must hold a permit listing the allowable levels of BOD₅, suspended solids, Coliform bacteria and other pollutants. The discharge permits are called NPDES permits which stand for the National Pollutant Discharge Elimination System.

Visit Report on 115 MLD DR. NAIDU STP PUNE

the STP. (If these items are allowed to enter the STP, they clog and damage the STP pumps, and cause stoppage of the plant.) The screening is achieved by placing a screen made out of vertical bars, placed across the sewage flow.

3. Grit Chamber (Mechanically), 4. Grit Chamber (Manual)

Grit chambers are basin to remove the inorganic particles to prevent damage to the pumps, and to prevent their accumulation in sludge digesters. There are two types of Grit chambers: mechanically cleaned and manually cleaned. In *mechanically cleaned* grit chamber, scraper blades collect the grit settled on the floor of the grit chamber. The grit so collected is elevated to the ground level by several mechanisms such as bucket elevators, jet pump and air lift. The grit washing mechanisms are also of several designs most of which are agitation devices using either water or air to produce washing action. *Manually cleaned* grit chambers should be cleaned at least once a week. The simplest method of cleaning is by means of shovel.

4. Preliminary Treatment

Preliminary treatment to screen out, grind up, or separate debris is the first step in wastewater treatment. Sticks, rags, large food particles, sand, gravel, toys, etc., are removed at this stage to protect the pumping and other equipment in the treatment plant. Treatment equipment such as bar screens, Comminutors (a large version of a garbage disposal), and grit chambers are used as the wastewater first enters a treatment plant. The collected debris is usually disposed of in a landfill.

Visit Report on 115 MLD DR. NAIDU STP PUNE

7. Secondary Clarifier (Treatment)

Secondary treatment is a biological treatment process to remove dissolved organic matter from wastewater. Sewage microorganisms are cultivated and added to the wastewater. The microorganisms absorb organic matter from sewage as their food supply. Three approaches are used to accomplish secondary treatment; fixed film, suspended film and lagoon systems.

8. Chlorine Contact Tank

This is used to disinfect the treated sewage and also separate sludge from it

9. Sludge Thickener

When the **thickening** of **sludge** is inadequate, the filtrate from **dewatering** will have large amounts of suspended solids returning to the **STP** and affect the water quality. Hence,

Subject: Permission for Survey project.

Respected Sir,

As a part of SE Civil Engineering curriculum, two survey projects are required to be completed for term work of subject **surveying**. The project is to be conducted at **Bhilarewadi, Katraj, Pune** on 28th April 2023. The total number of student is around 145. To accompany students and for completion of project work three subject teachers, lab assistant, and a lab attendant are required.

So, I request you to permit the following staff to go for project work

Mr. P R Modak - R

Mr. U J Jadhav

Mr. C R Yeole

Subject : Require Gate pass for survey instrument.

With reference to above subject following survey instruments require to take out of our college campus for SE Civil students project work at Bhilarewadi, Katraj, Pune on 28th April 23.

So I Kindly request you to please issue gate pass against following instruments for security purpose.

1. Auto level :- 2 Nos.
2. Staff :- 8 Nos.
3. Ranging Rods :- 15 Nos
4. Cross Staff :- 1 nos.
5. Tape (30m) :- 6 Nos.
6. Theodolite :- 2 Nos.

Report on Road Survey & Tacheometric Contouring Project

Place: Bhilarewadi-Katraj, Pune

Date: 28/04/2023

A Road Survey & Tacheometric Contouring Project was arranged at Bhilarewadi, Katraj, Pune by Department of Civil Engineering, AISSMS College of Engineering, Pune-1. The students of second year Civil Engineering Department gathered at the site to perform the projects mentioned in the SE Civil syllabus.

Faculties present for guiding students were Mr. P R Modak, Mr. U J Jadhav and Mr. C R Yeole. Faculty explained the students how to carry out both the projects thoroughly and distributed the instruments required. The instruments used are auto level and tacheometer along with different accessories like leveling staff, ranging rod, tape, cross staff, etc.

In this way the students were made to know about field work in details. The visit was received with admiration by the students and they also found the information useful.

DEPARTMENT OF CIVIL ENGINEERING SITE VISIT REPORT BY NITIN CHAKOR

DATE : Thursday , 04/05/2023

TIME : 10:00 am to 2:00 pm

VENUE : swargate metro station, pune

NAME OF THE CONTRACTORS : J Kumar infrastructures

SUBJECT : Structural analysis

BRANCH COORDINATOR : Prof S A Chavan

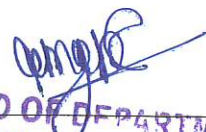

FACULTY IN CHARGE : Prof S A Chavan

INTRODUCTION

A Site visit at swargate metro station was conducted by department of civil engineering , AISSMS-COE ,on thursday , 04 May 2023. We are the students from second year civil engineering were taken to the construction site of maha-metro for observing and understanding the basic concept of indeterminacy and analysis of various types of beams, frames and structures . The visit has scheduled between 10:00 am to 02:00 pm. Students were allowed to observe and analyze the redundant trusses , implement application of various method and our queries were also answered by faculty in charge and site engineer during visit.

OBJECTIVES :

- Analyzing real life structures by imparting knowledge about various method involved in the analysis of indeterminate structures.
- Learning the basic difference between redundant and non-redundant structures.
- To gain idea about portal frames and clearing the concept of sway and non-sway.

1
HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS'S COE, PUNE-1.

❖ TECHINICAL OBSERVATIONS :

Trusses:

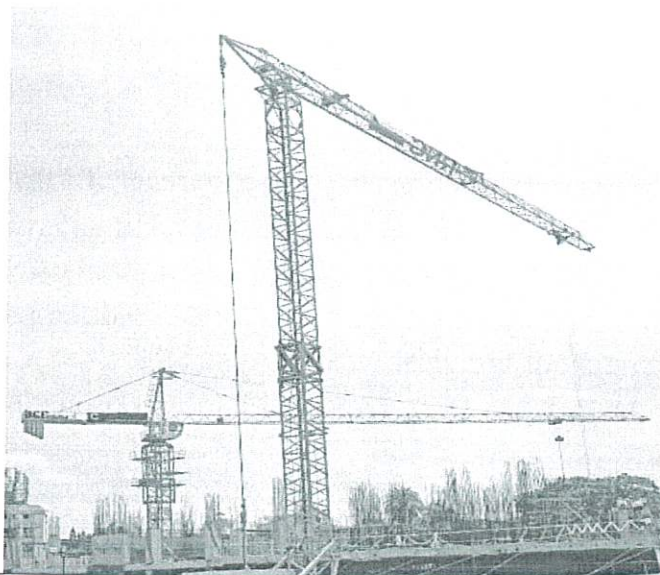

Trusses are most common type of structures used in constructions buildings, roads, bridges and towers etc. we observed the plane and space type of trusses. Our faculty in-charge chavan mam said to check the stability of following trusses.

We experiencing the real life trusses and successfully imparted our knowledge for checking the stability of trusses and recognize the redundant and non redundant members.

Cranes and suspended cables :

The analysis and design of the crane moving load calculate the influence of the vertical and horizontal loads (Max./Min. displacement, Max./Min. member strength, and reaction) caused by moving the crane on the crane girder, and it means a series of analyses and design processes for designing crane girder under common structures.

 2
**HEAD OF DEPARTMENT
CIVIL ENGINEERING
AIGSMS's COE, PUNE-1.**

Frames :

Different types of frame structures are available that have been used in building construction. They are classified into two major types namely rigid frame structure and braced frame structure. We seen that the fixed end rigid frame structure and our guide said these frames we analyze by Structural analysis methods such as the portal method (approximate), the method of virtual work, Castigliano's theorem, the slope-displacement method, the stiffness method, and matrix analysis, can be used to solve for internal forces and moments and support reactions.

❖ PHOTOS :

❖ **CONCLUSION :**

I am successfully understand the role of civil engineer for imparting the knowledge about structural analysis. Due to the visit my all basic concept of structures are cleared.

❖ **ACKNOWLEDGEMENT:**

Site Engineer Mr. usuf inamdar had given very valuable guidance for the professional career growth of the Civil Engineering students, also Director of M/S. J. Kumar Constructions for providing such a great opportunity to the students by allowing them to visit this construction site which will help the students in understanding various concepts of civil engineering branch at present and in future.

We would also like to thank Our Co- Ordinater **Mrs S. A. Chavan** for arranging this Visit and Our HOD **Dr. P. B. Nangare** for allowing us to go for site visit and making this visit successful.

Site Visit Report

Date: 4th May 2023

Duration: 9:30 am - 1:00 pm

Venue: Swargate, Metro Station, Pune

Subject: Concrete Technology

Faculty: Mrs. M.S. Chiwande

INTRODUCTION:

On 4th May 2023, our college, AISSMS COE, organized a site visit to J KUMAR RMC Plant located in Swargate, Pune. The purpose of the visit was to assess the plant's operations, safety measures, and overall efficiency. The plant is known for its modern machinery and equipment, including computerized batching systems, transit mixers, and concrete pumps. The site visit was scheduled from 9:30 am to 1:00 pm.

PLANT CAPACITY AND EQUIPMENT:

J KUMAR RMC Plant has a capacity of producing 60 cubic meters of ready-mix concrete (RMC) per hour. The plant is equipped with state of-the-art machinery and equipment, ensuring efficient production and quality control. Notable equipment includes computerized batching systems, transit mixers, and concrete pumps. There are total 3 silos

HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS' COE

installed. 2 silos have a capacity of 150 metric ton and 1 silo has a capacity of 100 metric ton. The plant also has a chill water tank for storage of chill water.

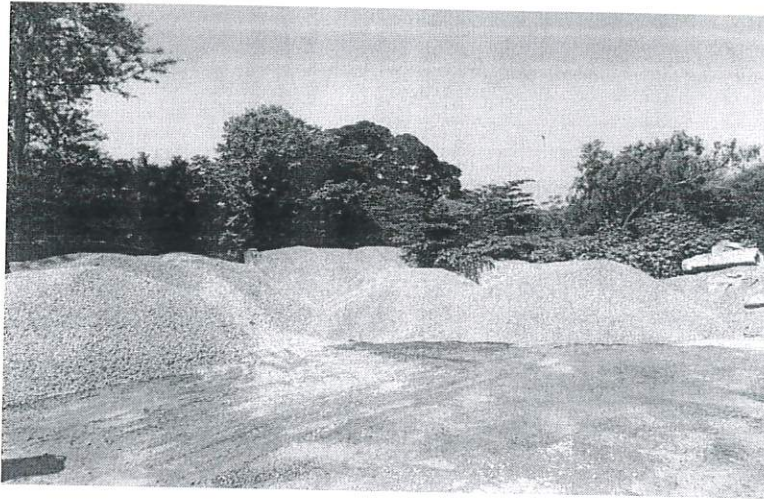

LABORATORY AND QUALITY CONTROL:

The plant boasts a well-equipped laboratory where the quality of the RMC is tested before it is dispatched to construction sites. This quality control process ensures that the RMC meets the required standards and specifications. The availability of an in-house laboratory enhances the plant's ability to consistently deliver high quality concrete. They use a special type of software for the concrete mix design. According to the data entered the mixing and the preparation of the concrete starts. It can give an error of about +/- 2% in case of aggregates and cement, and error of +/- 1% in case of water.

[Handwritten Signature]
HEAD OF DEPARTMENT
CIVIL ENGINEERING
AIGSMS's COE, PUNE-1.

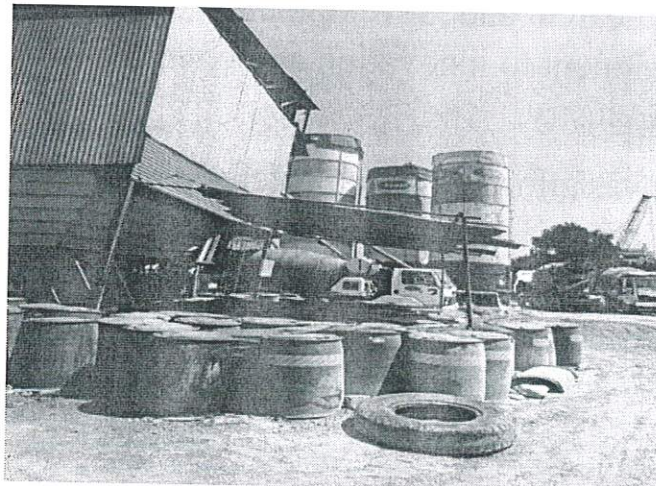

CONCRETE GRADES AND AGGREGATE SIZES:

JKUMAR RMC Plant produces a variety of concrete grades, including up to M60. This range of concrete grades allows for versatile usage in various construction projects. During the site visit, it was observed that the plant had two sizes of aggregates available on-site: 12mm and 20mm. The selection of aggregate sizes provides flexibility in meeting project-specific requirements.

ADMIXTURES AND BATCHING PLANT:

The plant utilizes admixtures from the Fosroc company, ensuring the enhancement of concrete properties and performance. The batching plant consists of a mixer, hopper, silo, storage bin, and a conveyor belt system. These components work together to facilitate the accurate and efficient batching of concrete.

Amber
HEAD OF DEPARTMENT
CIVIL ENGINEERING
A/SMS'S COE, PUNE-1.

RESEARCH AND DEVELOPMENT:

During the visit, the students and faculty members were introduced to J. Kumar's research and development initiatives. The company is actively involved in researching and developing innovative construction materials and techniques. Some notable areas of research include Chattan, Faulaad, Vajra (Ultra high-strength concrete), dry concrete mix bucket, transit mixer, and the utilization of glass fiber reinforcement.

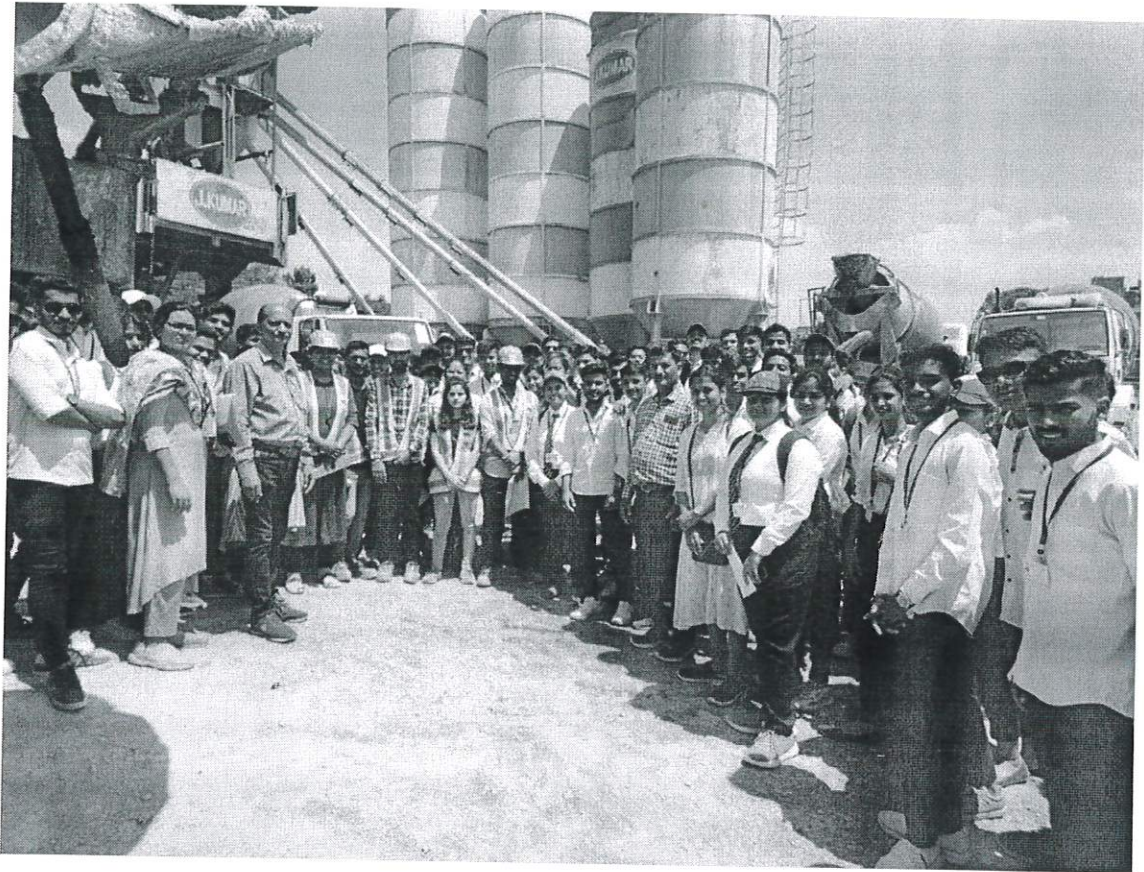

WORKING:

There is a hooper where the aggregates and cement are filled up. The material is then send further on the conveyor belt to the silos. According to the design the batching is done and the mixture of material is stored in another hopper. Below the hopper the RMC truck comes and stand then the material is been filled in the truck.

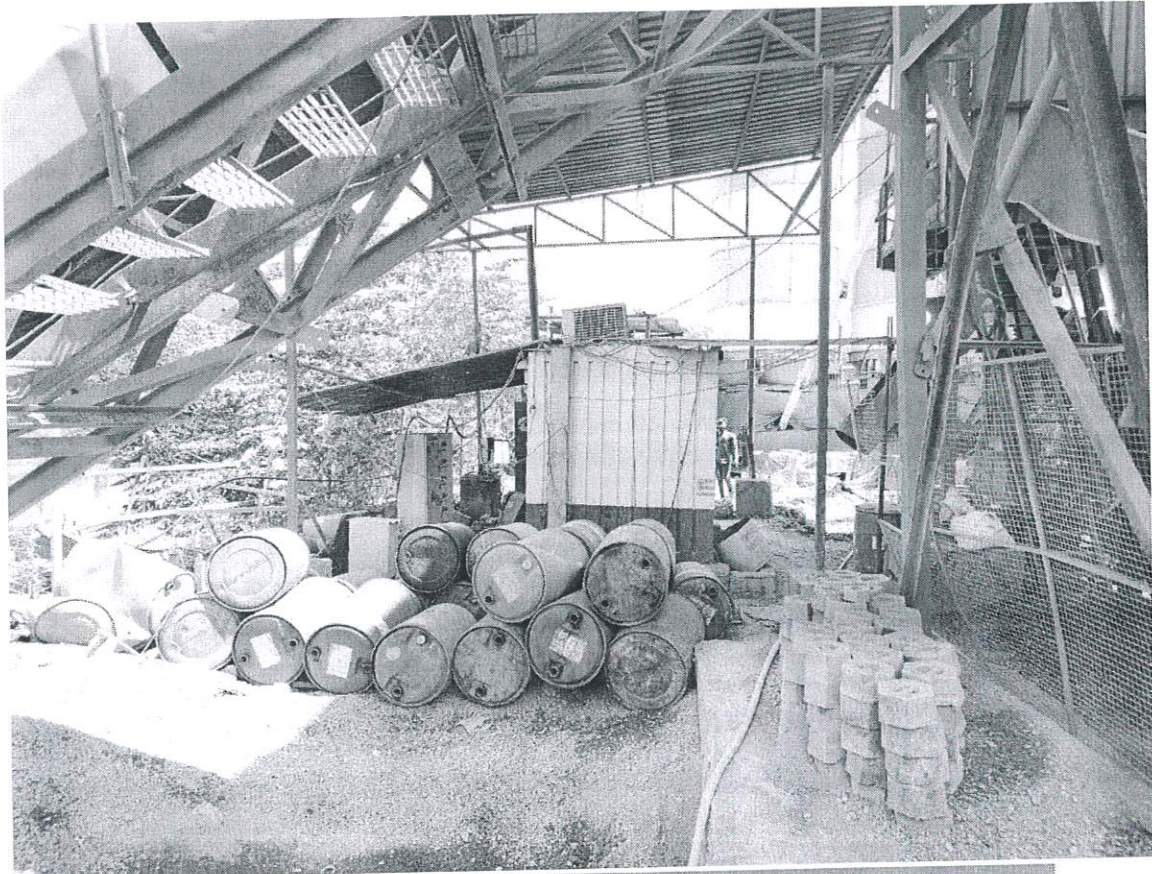

CONCLUSION:

The site visit to J KUMAR RMC Plant in Swargate, Pune provided valuable insights into the plant's operations, safety measures, and overall efficiency. The modern machinery and equipment, along with the presence of an in-house laboratory, ensure the production of highquality RMC. The availability of different concrete grades and aggregate sizes further adds to the plant's versatility. The introduction to J. Kumar's research and development activities showcased the company's commitment to innovation and continuous improvement in the construction industry.

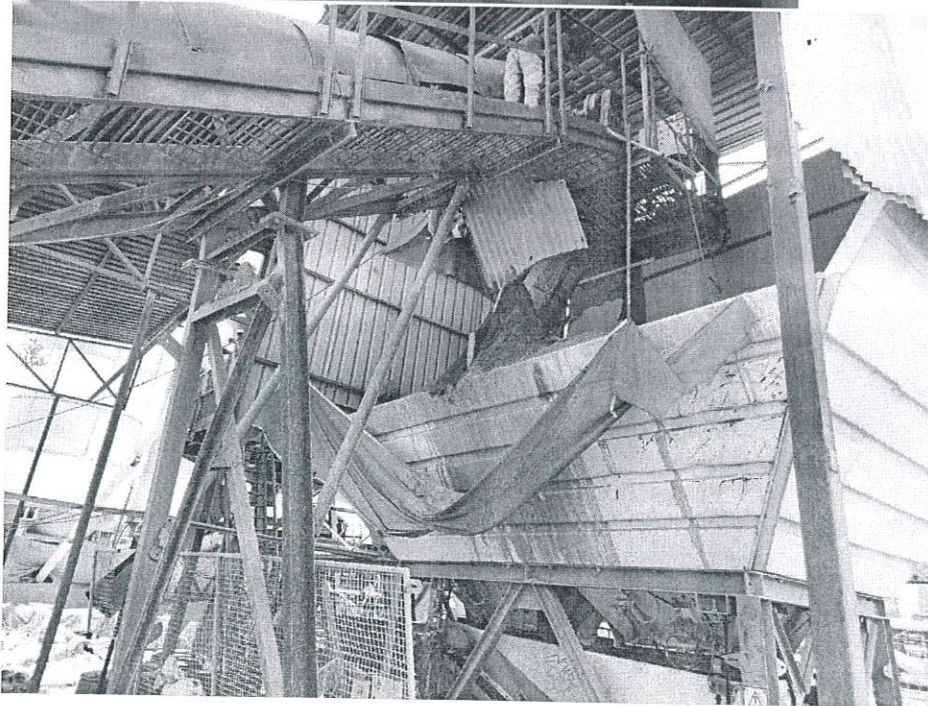

Overall, the visit was informative and offered a practical understanding of the concrete production process and the importance of quality control measures. The knowledge gained from the visit will be beneficial for the students in their academic and professional pursuits in the field of civil engineering.

Subject: Permission for Educational Visit.

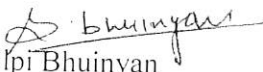

Respected sir,

As a part of the curriculum of Design of Reinforced Concrete Structures of T.E. Civil Engineering degree course of the Savitribai Phule Pune University, the students of this class are required to get information visit Detailing of Reinforcement of Slab, Beam, Column and Footing on site to get onsite working experience of Various Process.

This college is running a degree course in Civil Engineering and there are about 160 students in T.E. Civil (A & B Div) Current academic year 2022-2023, Term II.

We shall be obliged if you permit our 160 students for site visit on 28/04/2023. This Visit will be accompanied by 8 Faculty member at the time of visit. This visit will have only an academic purpose.

Thanking you in anticipation.

REPORT OF EDUCATIONAL VISIT

TO

SITE - SAI AVISHKAR,
DHAYARI, PUNE.

(UNDER SUBJECT OF DESIGN OF REINFORCED
CONCRETE STRUCTURES)

Class- TE (CIVIL)

Date: -28th April 2023

HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS's COE, PUNE-1.

INTRODUCTION

The department of Civil Engineering of AISSMS College of Engineering organized a one-day educational visit to the construction site – Sai Avishkar, Dhayari, Pune on 28th April 2023 for T.E Civil engineering students.

The Visit was mandatory to fulfil the curriculum requirement of Savitribai Phule Pune University (SPPU) for TE Civil students under the subject of Design of Reinforced Concrete Structures.

The site Visit was organized with the prior permission of Dr. P.B. Nangare HOD (civil). The visit was conducted to study in detail about construction of slabs and beams, its components, maintenance, facilities provided, etc. under the guidance of-

1. Dr. U. R. Awari
2. Ms. S. S. Bhuinyan
3. Ms. P. R. Satarkar
4. Ms. K. D. Kashid

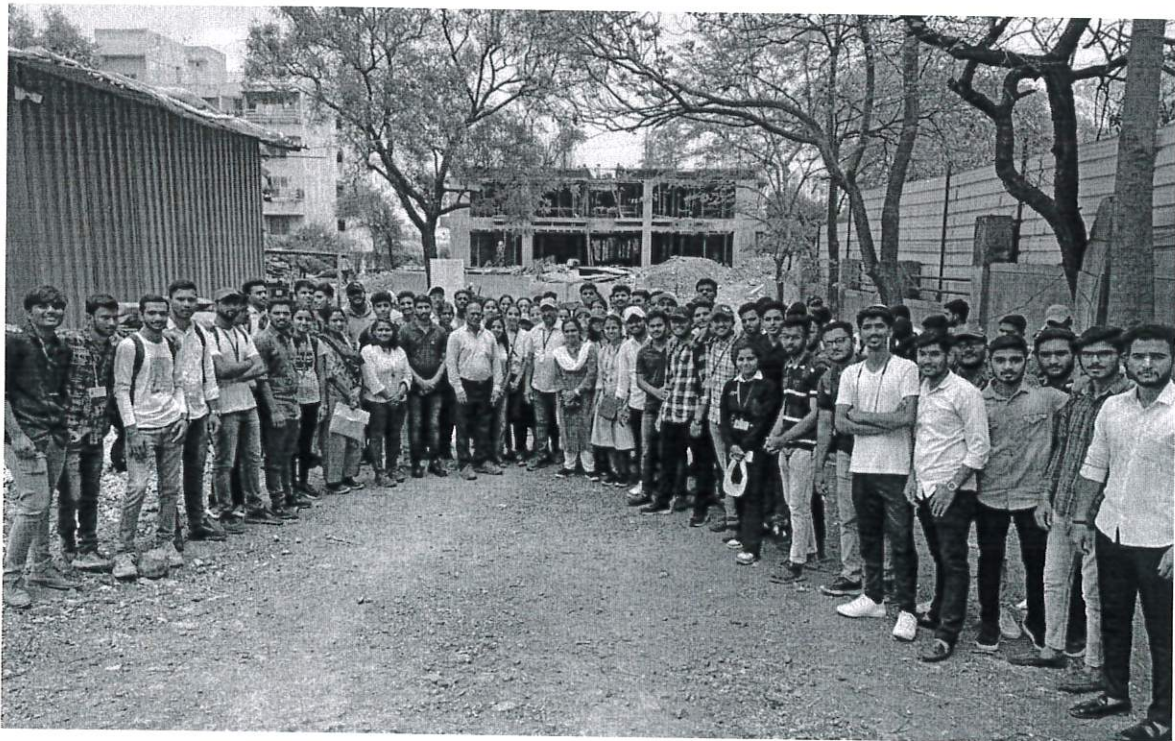

Figure 1: SITE VISIT AT DHAYARI

HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS's COE, PUNE-1.

The visit started with gathering of students at the site at 10.30 am. The visit started from slabs. The construction site is at the stage of slab. There are four flats per floor and it is a large construction project. It includes two- 3 BHK flats on each floor and two- 2 BHK flats. The cost for this flats are 10,500 per square feet.

SLAB:

Slab are the plate element as the depth of member is much smaller than its other dimension. It is commonly used as floors and roofs of building. It is subjected to transverse loads which are transferred to the walls or beam to support the slab. It transfers load due to bending action in one or two direction.

Following types of slabs, we have seen:

- **Based on shape-**

1. Rectangular
2. Circular
3. Square

- **Based on supporting condition-**

1. Simply supported
2. Continuous
3. Cantilever
4. Flat slab supported directly on column without beams

- **Based on spanning direction-**

1. One-way slab
2. Two-way slab

The slab which is supported on two opposite support is called as one-way slab. And the aspect ratio (L_y/L_x) is greater than 2. Also, when slab is supported along its all four edges and bends in two orthogonal directions, called as two-way slab.

HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS's COE, PUNE-1.

COMPONENTS OF SLAB:

1. Reinforcement:

The steel used of 500 grade, and steel was having characteristic strength of 500. i.e. ($f_y = 500$) and these bars are used for the reinforcement all over the site everywhere. Following measures of bars were used as following components:

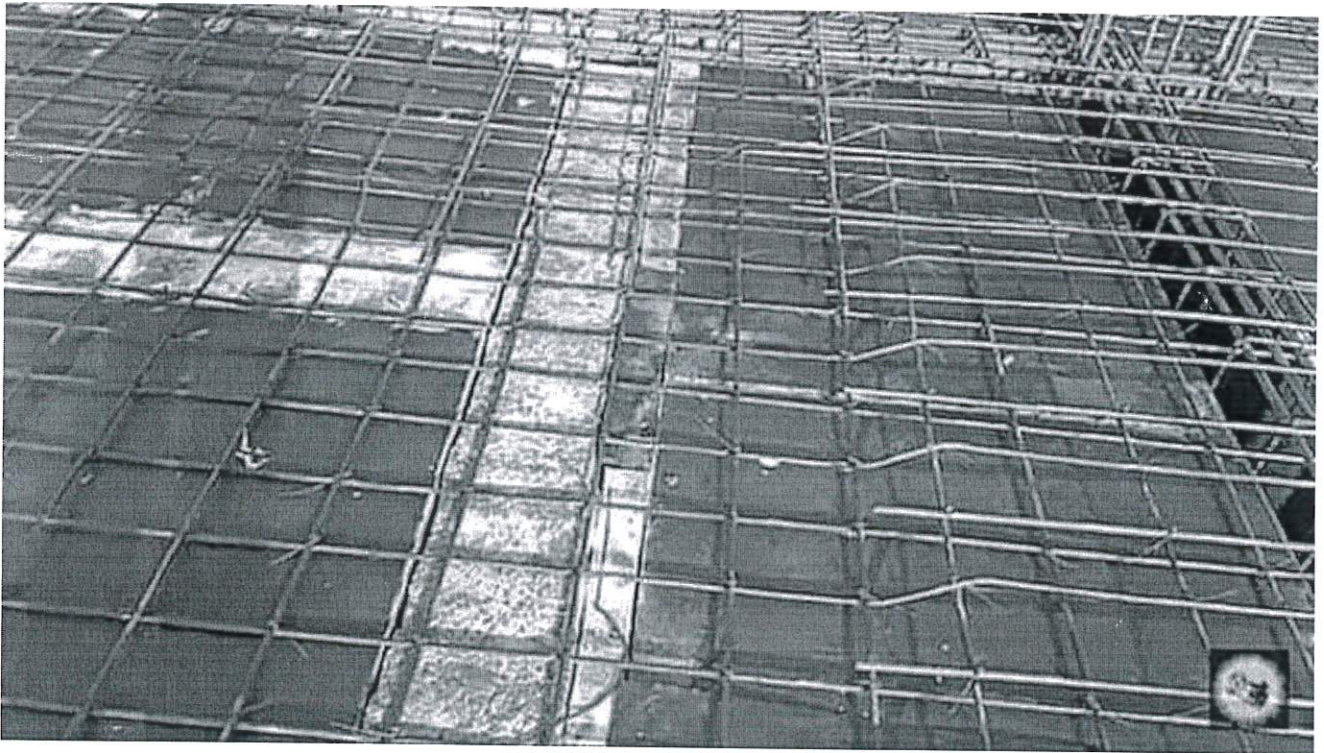

- a) 8, 12, 16 mm for slab
- b) 20 and 25 mm for beam

2. Stirrups:

Stirrups are provided to resist the shear.

3. Bent up bars:

Alternate bent up bars are also provided for hogging and sagging purpose.

HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS's COE, PUNE-1.

BEAMS:

We have also seen following types of beams:

Beam is a flexural member which resists the loads mainly by bending.

Beam is a structural element that primarily resists loads applied laterally to the beam's axis (an element designed to carry primarily axial load would be a strut or column). Its mode of deflection is primarily by bending.

The loads applied to the beam result in reaction forces at the beam's support points. The total effect of all the forces acting on the beam is to produce shear forces and bending moments within the beams, that in turn induce internal stresses, strains and deflections of the beam.

Beams are characterized by their manner of support, profile (shape of cross-section), equilibrium conditions, length, and their material.

Following are the types of beam:

- **Depending on support conditions-**

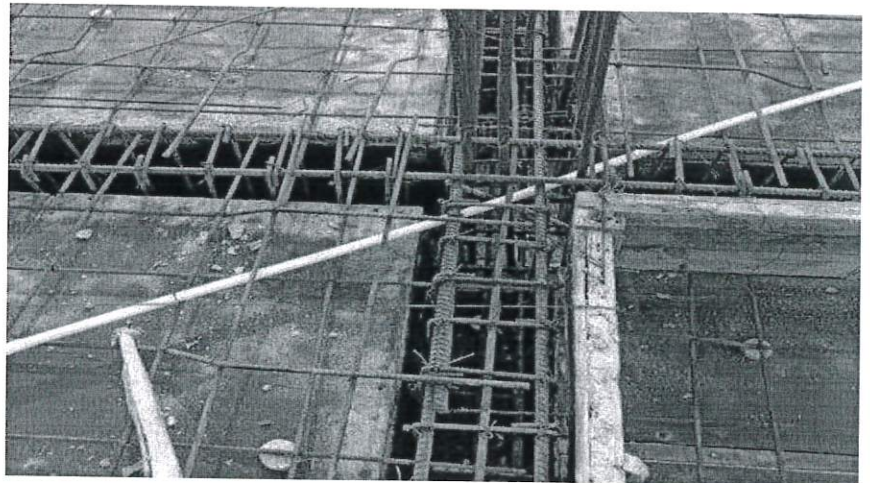

1. Simply supported beam
2. Continuous beam

- **Depending on geometry:**

1. Prop cantilever beam
2. Cantilever beam
3. Rectangular beam

- **Depending on position:**

1. Singly reinforced beam
2. Doubly reinforced beam

HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS's COE, PUNE-1.

COLUMN:

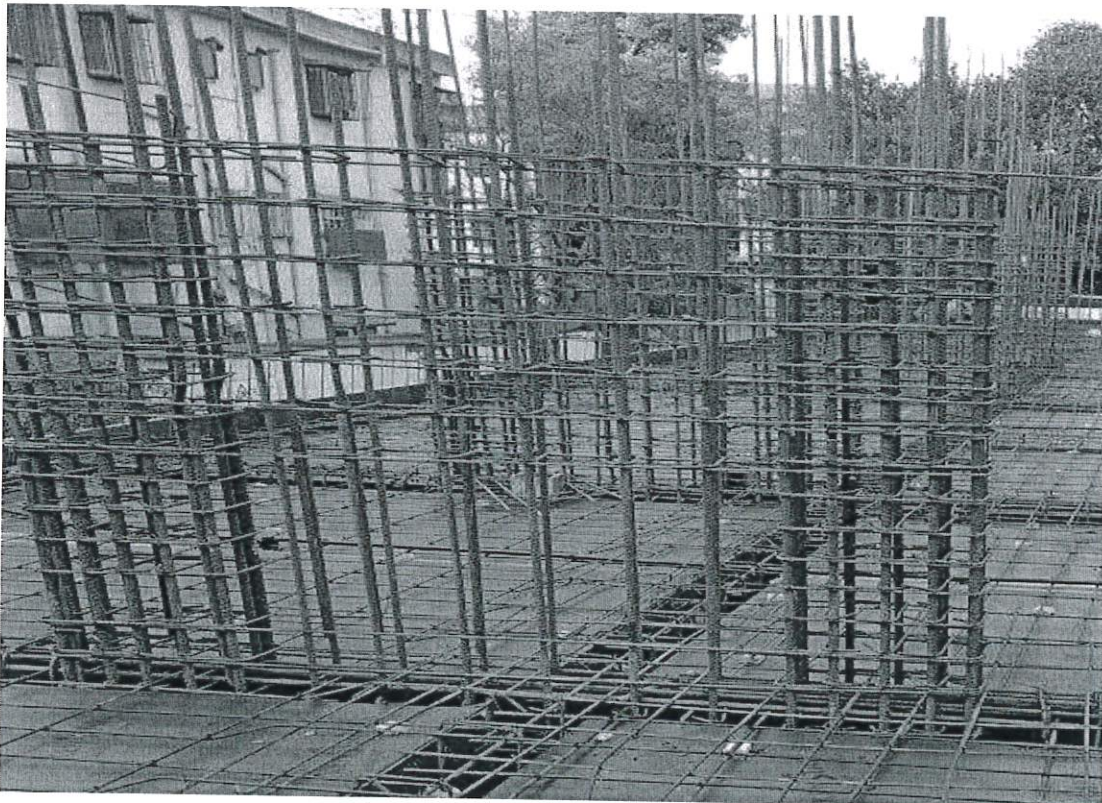

Column is a compression member, the effective length of which exceeds the three times the lateral dimension

Types of column:

1. Pedestal
2. Short column
3. Long column

The bar diameter is used for column is 16 mm, 20 mm, 25 mm, and 32 mm, in which 25 mm used for outer bars and 20 mm for inner bars. Size of column used is 1m x 0.6 m.

Diameter of bars used for stirrups is 10 mm.

[Handwritten Signature]
HEAD OF DEPARTMENT
CIVIL ENGINEERING
AIGSMS's COE, PUNE-1.

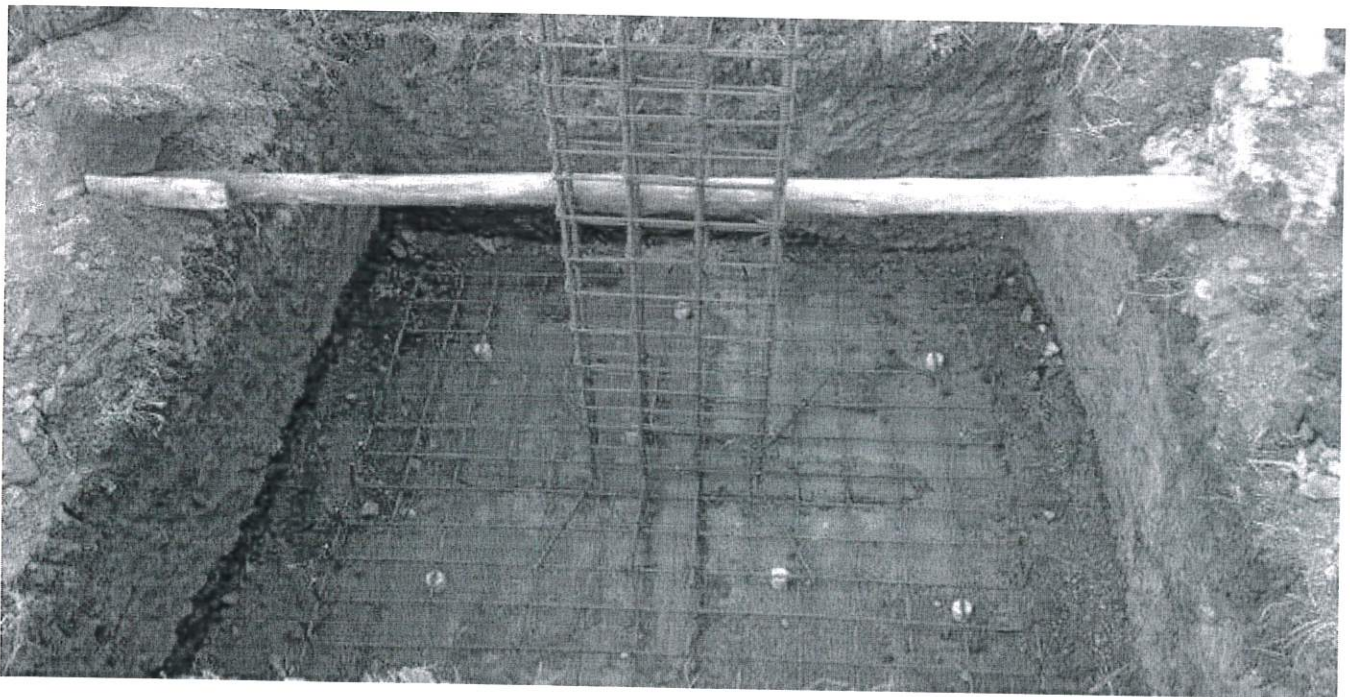

FOOTING:

The part of the structure which lies below the ground level is called as foundation. It supports the weight of the structure and the load carried by it, the type of foundation also depends on bearing capacity of soil.

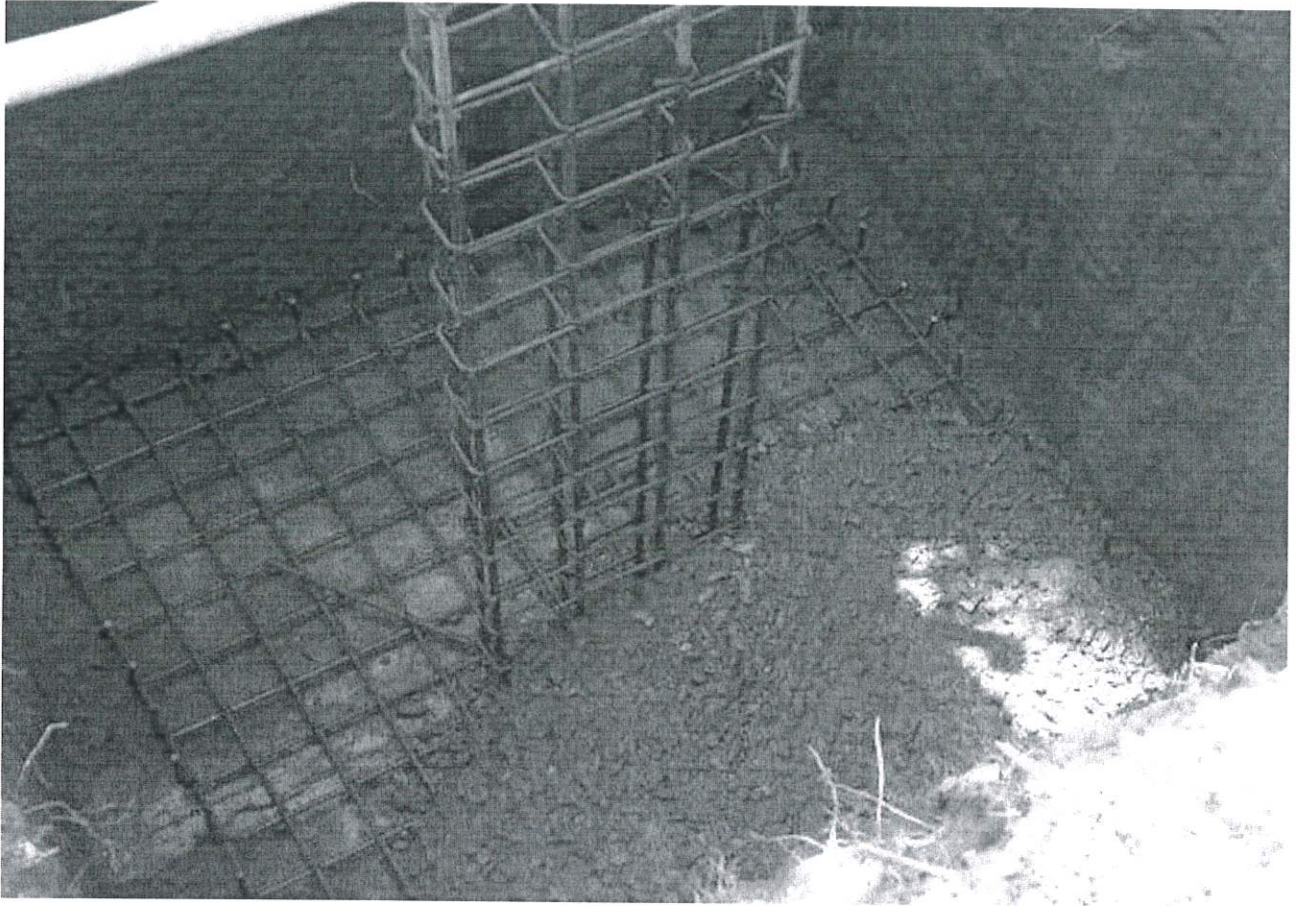

The site started with the cement selection and description about it. The grade of cement used for footing is m25 and that for column is m30 . Stepped footing is provided.

Purpose of foundation:

1. The main purpose of foundation is to spread the load over a large area.
2. To ensure the safety of the super structure against soil erosion and soil movements.
3. To increase the stability of the structure various environmental forces like rain and wind.
4. To provide a base platform for masonry and concreting
5. The thickness of a footing base slab is generally based on consideration of shear and flexure, which are critical near the column location. The SBC of soil is near about 350 kn/m². The size of footing is provided 5 X 3.5 M.

HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS's COE, PUNE-1.

After visiting the construction site, there was a question and answer session addressed by the subject teachers. The visit concluded with a feeling of satisfaction and enlightenment among students.

To,
Sub Divisional officer,
Nira Irrigation Sub Division,
Nira

Subject: Permission of site visit at Nira Deoghar Dam, Hydropower Station and Bhatghar Dam in May 2023.

Respected Sir/Ma'am,
As per Savitribai Phule Pune University, for the students of Final year (B.E. Civil Engineering) a site visit to a Gravity Dam or Earthen Dam, Hydraulic Structure and Hydroelectric Power plant is mandatory in the subject Dams and Hydraulic Structures and Hydropower Engineering.

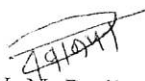

Therefore, we request to permit the students of BE (Civil) Along with the concerned faculty to visit Nira deoghar Dam, Bhatghar Dam and Hydroelectric Power Plant. There will be about 160 students along with 8 faculty members for the visit. We assure that the students will follow safety guidelines that will be given by you.

Our planned Date of site visit is 12th May, 2023, or convey any other suitable date of your convenience. We kindly request you to provide us an expert to guide our students, and also request to provide the literature material if any.

Expecting your favorable reply.

Thanking you in Anticipation

DEPARTMENT OF CIVIL ENGINEERING

DESIGN OF STEEL STRUCTURE

SITE VISIT REPORT

SITE NAME: - Indospace Industrial Park

SITE LOCATION: - Chakan Phase – 2, Pune

DATE OF VISIT: 14/10/2022

**HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS's COE, PUNE-1.**

COLUMN

1] Support Column: -

The column at the end support is trapped at the bottom and gets wider at the top. It has fixed support at the top and hinged support at bottom. This is because at the fixed end moment is generated and hence 50% additional cross section is required. To maintain geometry of structure as lateral load at top is more than at bottom fixed at top and hinged at bottom. The structure being PEB saves 20-25% material as compared to hot rolled steel structure as cross section of column is same along its height.

In PEB, columns are fabricated as per requirement and installed at site. 2 steel members of column are any connected-on web and not on flange. At standards internals. This column is also called GABLE COLUMN.

2] Intermediate Column: -

The column at the centre is having same cross section along its height this is as per design requirement of structure. The Flanges are almost a foot wide. The thickness of web is less as compared to flange. Few hook arrangement are made to some columns. **Bracings** are provided between the columns at regular intervals up to the gable beam. These bracings are also made of PEB steel.

RAFTER / GABLE BEAM: -

Since this a Gable frame, the rafters are also called Gable beams. Just like column the gable beams are wide at supports and at ridge line / ridge portion a tapered at the centres. (At mid span). This is due to window at which causes bending moment to be maximum at supports and minimum at midspan.

PURLINS: -

The Longitudinal purlins are moulded into C section from a flat section of steel. The Purlins are connected by nut and bolts. At regular intervals sag rods and tie rods are connected to purlins.

The floor was flat FM2-Compliant design to support high cube racking. Pathways are highlighted using florescent tape. Being a warehouse utmost care is taken to avoid any air and dust to enter the industry.

For the industrial Visit Following faculty accompanied along with students: -

1] Dr. U.R. Awari

2] Dr. S.R. Parekar

**HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS's COE, PUNE-1.**

- 3] Dr. U.J. Jadhav
- 4] Mrs. S.A. Chavan
- 5] Mrs. K.D. Kashid

The HR Head Mr. Sunil Kale of ETPL industries properly briefed us about the industry and made excellent arrangements for proper safety of students and faculty at the warehouse as well. Also, we thank Mr. Sandeep Malpathak, Managing Director of ETPL Industries for allowing Visit to the Industry.

We the Students of TE Civil of AISSMS College of Engineering, Pune. Thank Principal Dr. D.S. Bormane and HOD Civil Dr. P. B. Nangare for arranging this field visit.

Behind Hotel JW Mariott, Pune.

Subject: Letter of Gratitude.

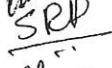

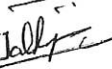

Respected sir,

On behalf of AISSMSCOE, Civil Engineering Department, we would like to thank you for giving us the permission for site visit under the subject Design of Steel Structures, in your industry on 14th October 2022.

We are expecting same kind of association with you in future as well.

Thanking You.

Yours faithfully,

Subject: - Permission for Industrial Visit

Respected Sir,

AISSMS College of Engineering is affiliated to Savitribai Phule Pune University, Pune and recognized by AICTE, New Delhi and Government of Maharashtra. This College is accredited by UVM with grade 'A' in 2018.

As a part of the third-year engineering curriculum of Savitribai Phule Pune University, Department of Civil Engineering is interested to carry an Industrial Visit under the subject Design of Steel Structures. Approximate 160 students and five faculties will be present during field visit. Kindly permit our students and faculties to complete the field visit in your above mentioned industry on 14th October, 2022.

Thanking you in anticipation.

Kennedy Road, Pune - 411 001

Subject: Letter of Gratitude

R. Sir

It gives us immense pleasure in thanking you for allowing us educational visit at Hot Mix plant on 04.11.2022.

It was a great learning experience for our students; detailed briefing given by the staff is worth appreciation.

Thank you once again for your support and I hope that we will continue to receive your Co-operation in future.

Thanking you,

Yours faithfully,

Dr G C Chikute Dr R D Nalawade
Subject Teachers- TRE

Yours sincerely,

Subject: Permission for educational visit.

Sir,

As a part of the curriculum of Transportation Engineering of B.E. Civil Engineering degree course of the Savitribai Phule Pune University, the students of this class are required to visit for hot mix plant.

This College is running a degree course in Civil Engineering and there are about 161 students in BE. Civil (A & B div.) current academic year 2022-2023. It is desired that our students should visit to get exposure hot mix plant.

We shall be obliged if you permit our students for this visit in first week of November 2022 accompanied by 2 faculties at the time of visit. This visit will have only an academic purpose.

Thanking you in anticipation I remain.

Yours sincerely

Subject: - Permission for Site Visit of Coastal Engineering (7th) semester academic year 2022-23

Respected Sir,

AISSMS College of Engineering is affiliated to Savitribai Phule Pune University, Pune and recognized by AICTE, New Delhi and Government of Maharashtra. This College is accredited by NAAC with grade A+ in 2018.

As a part of the Final-year Engineering curriculum of Savitribai Phule Pune University, Department of Civil Engineering is interested to carry Site Visit under the subject Coastal Engineering. Approximate 65 students and four faculties will be present during visit. Kindly permit our students and faculties to visit coastal model in your research institute in between 14th to 17th November, 2022 (3rd week of November).

Thanking you in anticipation.

Dr. V.S. Chavhan

R/Sir

It gives us immense pleasure in thanking you for allowing us educational visit at Scon Project on 07.11.2022.

It was a great learning experience for our students; detailed briefing given by the staff is worth appreciation.

Thank you once again for your support and I hope that we will continue to receive your Co-operation in future.

Thanking you.

Yours faithfully,

Dr S D Nagrale

Construction Management Site Visit Report

- SITE NAME: AVANTE SPACES LIMITED.
- SITE LOCATION : NEAR TO MAHARSHI KARVE STATUE, KARVE ROAD,PUNE.
- SITE CONSTRUCTION INDUSTRY : SCON PROJECTS PVT.LTD.
- Date of visit: 07/11/2022

Organised by Department of Civil Engineering College of Engineering Pune

- Arranged by-

Faculty coordinator: Dr. S.D. Nagarale

Faculty members: Mrs. K.N. Kulkarni, Dr. D.V. Wadkar

- SITE ENGINEER'S: Er. Chintaman Mahajan, Er. Joshi

Introduction

The visit to SCON Constructions Karve road Pune conducted by Department of Civil Engineering COE Pune was held on 7/11/2022 Monday. Students of TE Civil were taken to study the Cash flow analysis, Use of ERP software, work break down structure, Material flow system in Project and we're reached at the location on 11:00am in the morning.

HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS's COE, PUNE-1.

SCON Constructions:

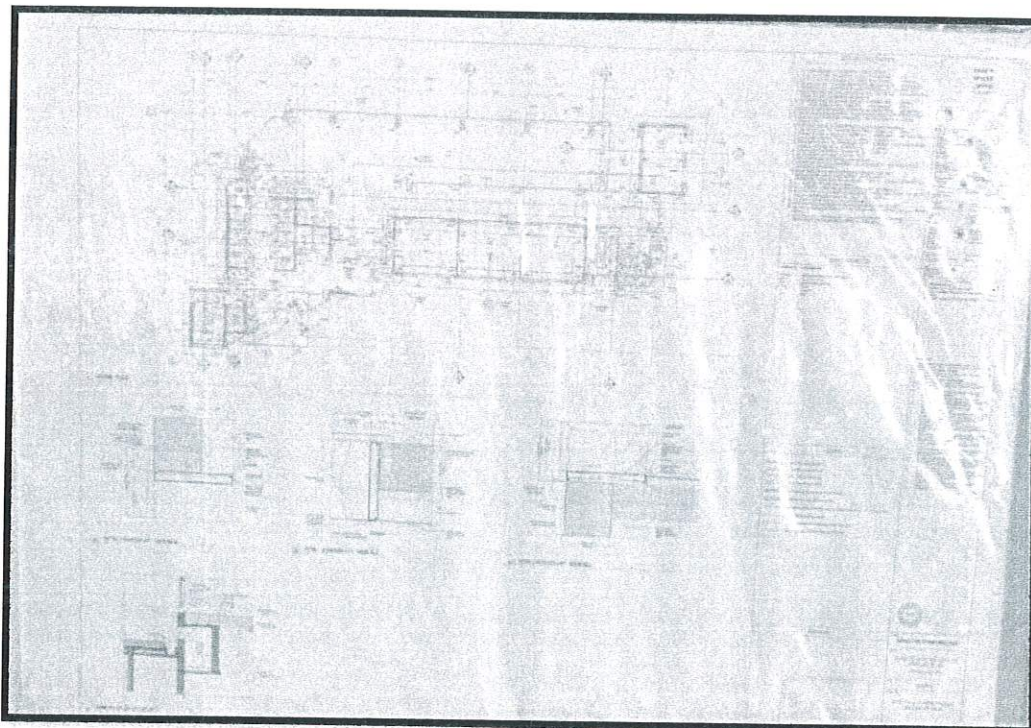

SCON stands for Samartha Construction Company. It has completed over 300 projects successfully till date most of it including commercial constructions. It has turnover around 1000 crores and has nearby 750 staff members. SCON is well known for quality, speed, safety and cost.

Cash Flow Analysis

Cash flow is the amount of cash and cash equivalents, such as securities, that a project generates or spends over a set time period. term 'cash flow' typically refers to an analysis of when costs will be incurred and how much they will amount to during the life of a project.

Predicting cash flow is important in order to ensure that an appropriate level of funding is in place and that suitable draw-down facilities are available.

At site we learned financial viability as a feasible factor in project management. Need of considering possible Revenue generation of the project beforehand.

Use of ERP software

Traditionally project details were managed manually then over a period of time with the help of excel. SCON has overviewed us through various softwares that are utilised in project management and provided us with the detail of software they are utilising for project that is ERP.

HEAD OF DEPARTMENT
CIVIL ENGINEERING
AISSMS's COE, PUNE-1.

ERP is the tool to monitor our project , manage resources. ERP easily track your Project progress in one place. Speed up revenue and profit growth ERP integrates the functional modules tightly. It is not merely the import and export of data across the functional modules. The integration ensures that the logic of a process that cuts across the function is captured genuinely. This in turn implies that data once entered in any of the functional modules.

Work Breakdown Structure

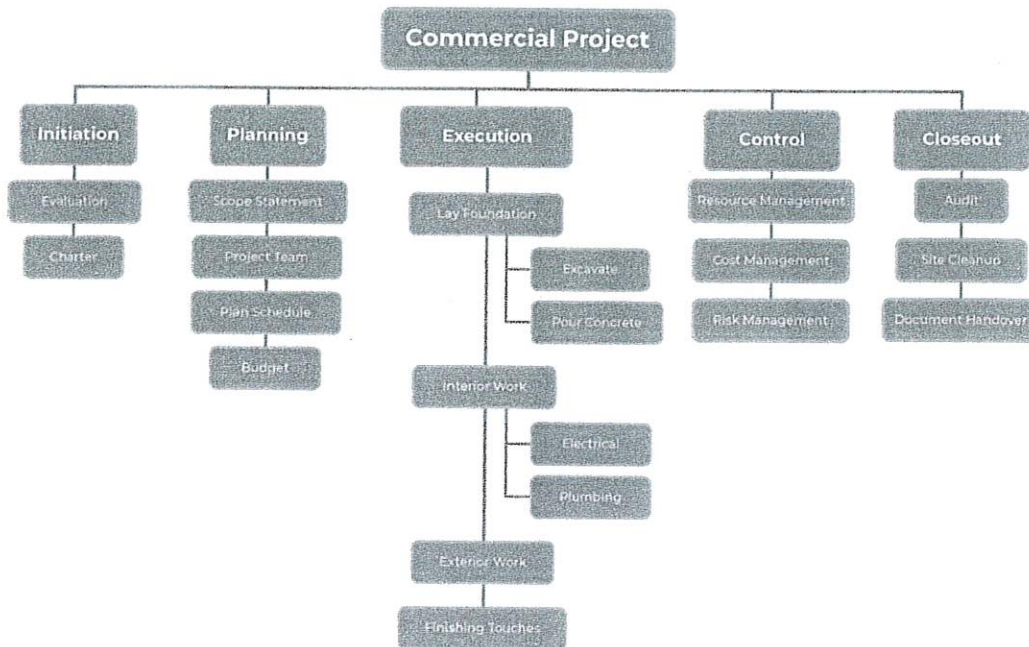

Work breakdown structure (WBS) in project management is a method for completing a complex, multi-step project. It's a way to divide and conquer large projects to get things done faster and more efficiently.

The goal of a WBS is to make a large project more manageable. Breaking it down into smaller chunks means work can be done simultaneously by different

team members, leading to better team productivity and easier project management.

Work Breakdown Structure

Material flow System

SCON demonstrated the management of logistics and factors influencing the movement of materials on work sites which was the material flow system. It therefore helps in the analysis of factors concerning the efficient use of materials in infrastructure projects

All possible safety measures were taken on site to ensure the safe and secure closure of the project. PPE's were always weared on site by workers, engineer incharge as well as by visitors. PPE kit includes goggles, helmets, gloves, boots, and high visibility vests and suits. .Safety signs allowed management to warn and raise health and safety awareness for employees and visitors. Safety was foremost priority at the site.

Subject: Permission to organize the visit at Water Treatment Plant, ~~Warje~~ Parvati

As per the requirement of curriculum for TE Civil 2019 course, we wish to arrange an educational visit for Water Supply Engineering through IWWA students' chapter. Around 150 students will be present during the visit in batches of 30 (5 batches for two days). It is expected to visit the WTP on 1st & 2nd November 2022.

So, kindly allow us to conduct the above said visit as per your convenience.

To,
Azharruddin Sir,

Date: 22/11/2022

Parvati WTP, Pune.

Dear Sir/ Madam,

We sincerely wish to thank you for allowing us to visit Parvati WTP and for guiding our students the various practical applications in water supply engineering on 21st & 22nd Nov 2022.

Looking forward for same cooperation from you

Thanking You!

Regards,

Dr D V Wadkar

Assistant Prof in Civil engineering
